ADVENTURER ENVIRONMENT

1.Nature	a		Identify where a waterway, or wetland, or river system in a local / national region has been environmentally effected by such as salinity, soil erosion, pollution, introduced species animal, fish or plant, and																							
		i	discuss causes and suggest future actions																							
AND		ii	suggest an action plan for improvement.																							
OR	b		Participate in a study of a local, national or international:																							
		i	conservation area and discover the habitat and/or fauna species being protected																							
AND		ii	prepare a report on your findings to the Troop.																							
2.Recycling	a		With your Patrol plan and take a leading role in a recycling project.																							
OR	b		Lead a group of Scouts in designing and producing an environmental educational presentation (such as poster, demonstration, activity).																							
AND		i	The presentation should show how humans have had an impact on the wetlands or waterways.																							
AND		ii	What can be done to improve the present situation.																							
AND		iii	Present your findings to your chosen audience.																							
3.Visit	a		Plan and visit the origin of the local water supply and learn what purification measures are taken. Make notes on evidence of water pollution, and measures to protect the watershed.																							
OR	b		Plan and visit an organisation devoted to protecting the local, national or international environment.																							
AND		i	Find out what aspects they cover (such as flora, fauna, vegetation, waterways), and																							
AND		ii	Help out on a service activity for a total of twelve hours.
